Dear Chaitan,

I am writing to confirm that the undersigned postdoc from my lab is applying to participate as a mentor in the Stanford ChEM-H Undergraduate Scholars Program.

Should an undergraduate be matched with my laboratory, that student will be able to participate in laboratory activities and group meetings and will be provided with space and consumables with which to conduct research.

I acknowledge that the undergraduate student will be engaging in a year-long program working part time during academic quarters (approx. 8 hours/week) for research credit and full time during Summer quarter with a summer research stipend provided by Stanford ChEM-H. The undersigned postdoc will mentor the undergraduate in the laboratory and will assist the student in developing a proposal for summer research. I understand that part of the student’s research responsibilities also includes attendance at a weekly seminar with other undergraduate researchers in the program.

This program offers the members of Stanford’s postdoctoral community a unique opportunity to develop mentorship skills and I support my postdoc’s interest and participation.
